Environmental Policy

DOCUMENT REFERENCE	SPK-POL-03:2026
VERSION / STATUS	2.0 - Approved
POLICY OWNER	Spook Directors
APPROVED BY	Martin Luck
APPROVED / EFFECTIVE	13 October 2026
NEXT REVIEW	13 October 2027

Spook Limited | Registration number 04630774

“Spook” means Spook Limited. “Directors” means the two Spook founding directors: Martin Luck and Andrew des’ Ascoyne.

Each policy will be reviewed annually and sooner where changes in legislation, business activities or identified risks require it.

01 Purpose

Spook is committed to reducing the environmental impact of its operations and making responsible decisions about energy, equipment, travel, procurement and waste.

Spook will comply with the environmental requirements applicable to our activities and locations and seek practical, measurable improvements.

02 Scope

This policy covers Spook's office and remote-working activities, service delivery, business travel, purchasing and the handling of company equipment and waste.

It also informs the selection and management of suppliers, including technology and hosting providers, where Spook can influence environmental performance.

03 Responsibilities

Directors will oversee environmental priorities, allocate appropriate resources and review performance.

Employees and contractors must follow relevant arrangements, avoid unnecessary resource use and report environmental concerns.

Those responsible for purchasing and disposing of equipment must consider environmental impacts alongside security, quality, cost and operational needs.

04 Energy, technology and resources

Spook will:

- Use energy-efficient equipment and appropriate power-management settings.
- Avoid unnecessary computing, storage and resource consumption while maintaining service reliability and security.
- Consider credible environmental information when selecting hosting and other technology suppliers.
- Extend equipment life through suitable maintenance, repair and reuse.
- Reduce unnecessary printing, packaging and single-use materials.

Equipment must not be switched off or altered where doing so would compromise monitoring, customer services, safety or security.

05 Travel and procurement

Remote meetings and remote support should be used where practical and suitable for the task.

Where travel is necessary, employees should consider the journey's purpose, transport options and opportunities to combine visits. Purchasing decisions should take account of durability, repairability, energy consumption, packaging and end-of-life treatment. Environmental claims made by suppliers should be assessed on the available evidence.

06 Waste and pollution prevention

Spook will prioritise avoiding waste, followed by reuse and recycling where appropriate.

Business waste must be stored securely, separated as required and transferred only to appropriately authorised organisations. Required transfer and disposal records must be retained.

Electrical equipment, batteries and hazardous materials must be handled through suitable routes under the rules applicable to the relevant UK nation. Company waste must not be placed in household collections unless that arrangement is lawful and authorised.

Equipment containing information must be securely sanitised or destroyed before disposal or reuse. Data-security requirements must be considered alongside environmental objectives.

07 Objectives and evidence

Directors will maintain a proportionate environmental action plan with named owners, target dates and measurable actions.

Measures may include business travel, electricity use where data is available, equipment reuse and waste disposal. Where information is estimated or incomplete, that limitation must be recorded.

Spook will not claim carbon neutrality, net zero, certification or quantified environmental savings without suitable evidence.

08 Reporting, breaches and review

Waste-handling concerns, spills, suspected pollution or other environmental incidents must be reported promptly to a director.

Spook will investigate incidents, take corrective action and make any required notifications. Deliberate or repeated breaches may result in disciplinary or contractual action.

Directors will review this policy and the environmental action plan annually and update them when activities or legal requirements change.
